,0033BR	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance	, EOC
	from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the	,R23MEOr
SAL	multiplying the position with the distance from the basket	
3BR23mf	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a contiguous subarray of size K from the given array.	NEOO33E
3	Note:	
3ME003	* A subarray is a contiguous part of array.	33BP131
ν	* Assume 1 based indexing.	3
3827	* The array contains both negative and positive values.	· ·
0033	* Assume the player is standing on a cartesian plane.	223ME00
,(	Input Format	21
3BR23ME1	- input1:An integer value N representing the number of shots made by the player	o.b.
36		, E0033B1
0.0	- i <b>nput3</b> : An array of integers
